C:\Users\Azur\Documents>composer

Composer version 2.1.5 2022-01-21 17:25:52

Usage:
  command [options] [arguments]

Options:
  -h, --help                Display this help message.
  -q, --quiet                Do not output any message.
  -V, --version              Display this application version.
  --ansi                     Force ANSI output.
  --no-ansi                 Disable ANSI output.
  -i, --interactive          Do not ask any interactive question.
  --verbose                  Display verbose and memory usage information.
  --no-plugins              Whether to disable plugins.
  --scripts                  Skip the execution of all scripts defined in composer.json file.
  --working-dir=WORKING-DIR If specified, use the given directory as working directory.
  --cache                   Prevent use of the cache.
  -v, --verbose              Increase the verbosity of messages: 1 for normal output, 2 for more verbose output and 3 for debug.

Available commands:
  about                      Show a short information about Composer.
  archive                    Creates an archive of this composer package.
  browse                     Open the package's repository URL or homepage in your browser.
  cc                          Clear Composer's internal package cache.
  ci                          Check that platform requirements are satisfied.
  clear-cache                Clear Composer's internal package cache.
  clear-package-cache        Clear Composer's internal package cache.
  config                     Sets config options.
  create-project              Creates new project from a package into given directory.
  diagnose                   Shows which packages cause the given package to be installed.
  dump-autoload              Diagnoses the system to identify common errors.
  dump-autoload              Dumps the autoloader.
  exec                        Executes a command in a package's directory.
  find                        Discovers how to help find the maintenance of your dependencies.
  global                      Allows running commands in the global composer bin (C:\WINDOWS\system32\cmd.exe).
